Custom Breast Prostheses Limited<sup>TM</sup>

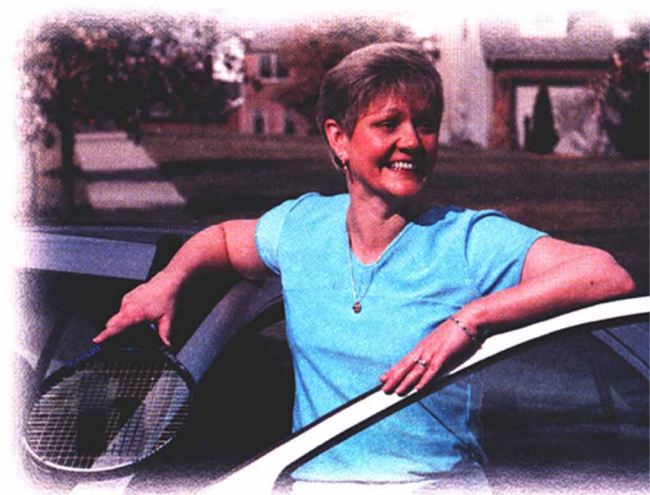

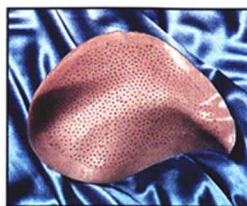

Fitting Image's custom breast prosthesis requires no special type of bra. Because the prosthesis is silicone based and waterproof, you can swim while wearing a bathing suit of your choice.

Our custom breast prosthesis is constructed of a unique patent pending silicone foam core, which remains light and cool to wear due to its breathable nature. The technology used to create this light, symmetrical breast form is superior to other products available. This unique duplicate of your natural existing breast will have you feeling the best you can be.

It is extremely durable with normal use so you don't have to worry about avoiding sharp objects or jumping pets.

You will experience balance, comfort and familiarity the moment it is fitted to your chest wall.

From the moment you are fitted with your Fitting Image custom breast prosthesis you will regain your sense of self-confidence and poise. Fitting Image will create your custom breast prosthesis from a carefully cast model of your chest wall. The prosthesis will fit snugly to each dimension of your surgery site.

- Customized to imitate existing breast, nipple size and colour.
- 50% lighter than other prostheses on the market.
- Breathable and Waterproof.
- Wear your choice of bras or swimsuits.
- 24 skin tones and nipple tones to match.
- Regain your active lifestyle. Golfing, swimming, tennis, running.
- Adheres to the skin and is so lightweight, it can be worn without a bra.

## Fitting Image

"Fitting Image Custom Breast Prostheses Limited<sup>TM</sup> and Radiant Impressions<sup>TM</sup> have designed this brochure to offer insight into what I believe to be the most superior breast prosthesis on the market today. My husband, Dr. Terry Ferguson, created this custom breast form as a gift to me with the hope of giving me back a sense of wholeness and to renew my confidence and self-esteem. It did all of those things, and has been the greatest gift of love that I could ever receive. This gift of love is now presented to all of you who have suffered from breast cancer surgery with the hope that it will improve your lives, just as it has mine."

Sincerely,

Frances Ferguson  
Radiant Impressions
